

LOYALTY4LIFE

THIS IS EVOMS!

At Evolution MotorSports we exist to satisfy our customers' addiction to speed and passion for high performance. We engineer, manufacture and offer the highest quality performance components for an elite group of extreme individuals. We are obsessed with delivering the ultimate level of performance through developing superior quality products, stringent testing and unparalleled customer service. Over time, we endure, evolve, persevere and have become omnipotent in our industry.

TODAY!

Evolution MotorSports 25,000 square foot R&D Center and showroom is located in Tempe, AZ - USA. Our state of the art facility is equipped to cater to any customer needs. We commit ourselves to LOYALTY4LIFE! for all our customers!

Read on to discover more about all of our services from full race preparation to detailing services and our complete concierge services. At Evolution MotorSports we can create peace of mind with any project.

EVOMS EVT700 ready to launch at Texas Mile!

The EVOMS Team & The Gumpert Apollo!

EVOLUTION MOTORSPORTS

Driving a performance car and driving an intelligently tuned performance automobile are very demanding and contrasting dynamics. The first can easily be accomplished by driving a new Porsche 997 turbo out of the dealer showroom and living happily with regular maintenance and a cup of coffee at the dealer. The second requires Evolution MotorSports (EVOMS) in Tempe, Arizona in the USA, where intelligent tuning and Insanely Tuned converge!

EVOMS specializes in building Performance Systems and Supercars that maintain creature comforts for street driving while setting scorching times on race days, charging through the canyons, or enjoying those long drives on wide open freeways to the next "Cars & Coffee". Porsche, Lamborghini, Ferrari, Bentley, Mercedes, Gumpert, and many other marquees start their transformation with these 5 memorable letters: E-V-O-M-S!

ESTABLISHED - 1997

Since 1997, EVOMS founder, Todd Zuccone, and his team of fanatical designers have been engineering and crafting Performance Systems that have fueled an industry. Mr. Zuccone was born into a "Porsche" family and spent his early years at the race track where he was modifying and driving Porsche 911's at the age of 12. This fueled his passion and set in motion his lifetime dedication and experience with Porsche. Read on to learn more about what makes Evolution MotorSports a true leader in aftermarket Porsche performance.

Mr. Gumpert & Mr. Zuccone

INDUSTRY LEADERS

Evolution MotorSports has been a recognized leader in the aftermarket performance industry for over a decade. More recently, in 2008, Evolution MotorSports was selected by Mr. Roland Gumpert, founder of Gumpert Sportswagenmanufaktur GmbH, as the U.S. final assembly and Performance Validation Center for the world renowned Gumpert Apollo. The Gumpert team selected Evolution MotorSports for their exceptional technical background, unparalleled facility and their commitment to perfection. This type of affiliation doesn't come by accident, but driven by a passion for excellence and an annoying obsession with fine details. This is Evolution MotorSports.

EVOMS = WINNING PERFORMANCE

Performance-Engineered is the foundation behind developing our impeccable bloodline of upgrade components. Thousands of hours of advanced CAD design engineering, prototyping, virtual testing, and real world product validation are invested in our products ensuring the most efficient and powerful designs, fused with function and reliability. Our upgrades and performance systems are designed to meet or exceed the quality of OEM components and provide pure exhilarated performance for today, tomorrow and years to come. EVOMS products represent the next level of performance that other aftermarket companies can only dream about creating.

The Evolution MotorSports Facility. Tempe, Arizona - USA

Call Evolution MotorSports.. FIRST!

THE FACTS

Everyone knows that dealer work is very expensive and impersonal. However, there is a huge difference between a stock vehicle and Evolution MotorSports cardiac tuned vehicle. That difference is PERFORMANCE.

Car dealerships are not familiar with high horsepower vehicles. They are not interested in preparing a car for a race weekend.

Unveiling the Gumpert Apollo to the USA.

From today forward, think performance! Call EVOMS first for all automotive needs. Through our highly trained staff and trusted partners we offer any of, but NOT LIMITED to the following;

- ▶ Routine Maintenance
- ▶ Race Track Prep and Return to Street
- ▶ Concierge Services (sales, detail, paint and body)
- ▶ Wheels, Tires, Suspension and Brakes

PERFORMANCE FIRST

Evolution MotorSports is unlike any tuner, race garage or performance shop... probably the United States. We offer real performance services not readily available in the valley of the sun. EVOMS is, in fact, a research and development center and we design and distribute

The EVOMS Showroom

proprietary components around the globe. Our Performance Systems begin with of EVOMSit ECU Tuning, sport exhaust and EVOMS V-Flow air intake systems. We race what we design and own the same vehicles that our customers do. We only offer our customers the products we have tested and know perform to our exacting standards.

Dynamometer testing on our 4WD Mustang Dyno, custom ECU Tuning with EVOMSit, corner balancing and race alignments are all critical services required on a daily basis for EVOMS clientele. Find out more about intelligent tuning from Evolution MotorSports at www.EVOMSit.com

EVOMS / CGT for Intelligent Tuning at Firebird International Raceway, Phoenix, Arizona

TRACK DAYS. FIRST STOP, EVOMS!

RACE PREPARATION

Preparing a vehicle for a race event requires special attention to details by technicians who understand motor sports and race their personal vehicles. At Evolution MotorSports we are passionate about racing and we compete with our vehicles on a regular basis. The same is true for our customers who book appointments for race prep before these precious days, to ensure safety and optimum performance of their vehicle. From a simple brake pad and tire swap, to chassis setup, roll bars and racing seats, we handle the details for all track events. We also offer track side support and driver coaching which can help to fine tune both the driver and vehicle. After race events, we service the vehicle, reverse the process and perform detailing services to have the car looking like new for street enjoyment. Some items and services we offer include: bolt in roll bars, 5-point safety harnesses, fire extinguishers, race seats, race brake pads, race brake rotors, high temperature brake fluids, race wheels and tires, corner balancing, track alignments, etc. Inquire for prices, specific details and custom tailored track packages that suit our specific needs.

EVOMS CONCIERGE SERVICES

SALES & PRE-PURCHASE INSPECTION

With EVOMS Vehicle Sales we bring buyers and sellers together. Evolution MotorSports can be the one phone call to make, to acquire a certain dream car, or to allow our professional marketing team sell a car to

'74 RSR
Stored in EVOMS Showroom

make space in the garage for the next big project. The EVOMS team will arrange for photos, videos, magazine advertising and a full barrage of web marketing,

assuring the right buyers see the right vehicles. We can even arrange for the vehicle to be displayed in our 6000 SF showroom. Recent EVOMS consignments have sold in Norway, Dubai, New York and Finland. Another service we offer is a complete vehicle analysis and mechanical inspection using our comprehensive and proprietary 240 point EVOMSi inspection program. Pre-purchase inspection is critical with high performance vehicles and we are experts! Never buy a dream car until it is confirmed to not be a nightmare!

STORAGE & TRANSPORTATION

For those customers that can not stand the thought of their vehicle being left alone all summer while their enjoying the cool weather in the Northern Territories, EVOMS offers vehicle storage and our extensive

concierge services. We offer a wide variety of different storage and maintenance programs suit any needs.

Additionally, if vehicle transportation is required, EVOMS can transport vehicles coast to coast in our enclosed transporter and we work with the most reliable logistics companies to ensure safe and prompt delivery nationally and internationally. Inquire about these EVOMS exclusive concierge services which have been designed to take the headache out of the luxury performance vehicle experience.

- ▶ Tail-light Tinting

ICE SERVICES

- ▶ Audio/Video and Vehicle Electronic Upgrades
- ▶ Built in Radar Detectors using Escort & K40
- ▶ iPod Integration
- ▶ Customized Alarm Systems
- ▶ Custom Subwoofer Systems

Wheels

Unlike many companies today that are merely “marketers” of wheels produced by some offshore factory in a remote location of the world, Nutek is in fact the “manufacturer” of their entire line of wheels. More to the point, their wheels are made in the USA, where Nutek can closely oversee the production and quality processes that define every Nutek wheel. While we believe this to be essential, the real story lies in what’s behind the scenes, owners with more than 40 years of combined experience. One of our owners was the founder of HRE, a company well known as an industry leader in three piece modular wheels. Prior to selling the company 1998, he invested nearly 20 years in developing the technology that has set the industry

standard for quality and excellence in modular wheel products. It is no secret that Nutek has the experience to build quality three piece wheels. With so many companies getting into the three piece wheel business, we realized that it is essential for a wheel company that we align with EVOMS should be well apart from the rest of the pack. Nutek is passionate about manufacturing wheels for the serious motoring enthusiasts that stand above all others. Highest quality, the most innovative designs and the most “unique finishes” available in the wheel industry today clearly set Nutek in a league of their own when it comes to custom 3-Piece wheels – where traditional limits do not apply. Porsche Sizes: 19” & 20”. Other applications to 24”

Wheels

FIKSE FORGED MODULAR MOTORSPORTS WHEELS

Since 1992, FIKSE USA has been creating wheels that are lighter, stronger, and built to a higher standard. Each design takes the art and science of wheel construction to a new level. Available in an array of styles, fitments, and finishes, all FIKSE wheels are manufactured exclusively with advanced aerospace materials and processes.

From their popular Forged Modular™ wheel line to their specialized racing wheels, the FIKSE philosophy is to build upon a sound engineering foundation as the basis for excellence. FIKSE has an ongoing commitment to research and vigorous MotorSports program drive continuous improvement in their methods, materials, and processes.

Attention to engineering fundamentals also tends to produce the most visually pleasing wheels. This painstaking design effort results in a whole greater than the sum of its parts: a wheel that both appeals aesthetically and performs competitively at the highest level. An investment in FIKSE wheels is an investment in quality. Every step of the way, FIKSE USA specialists can help make the style, fitment, and finish choices that compliment your personal driving goals. Forged 1-Piece and Forged 3-Piece Wheels. Porsche Sizes 17", 18" & 19"

EVOMS Essentials!

EVOMS - GT3 SEATS

EVOMS understands that prepping for the track is far more complex than just a tank full of race fuel. It means 5-point harnesses, safety equipment, a roll bar, suspension adjustments, race brake pads, as well as wheel and tire changes. However, an upgrade that often gets overlooked are performance seats. When on the track, proper support from a race seat helps keep the driver firmly planted for superior control. We recommend the Porsche GT3 seat for its comfort and ability to balance both track and street driving.

CUSTOM FABRICATION

Evolution MotorSports fabrication division is where many of our final products begin life. This department of EVOMS is responsible for all of the prototyping during the design and test phase of product development. The fabrication division is also responsible for the production of many final EVOMS products that end up in our Performance Systems and on our customers cars. Another function of this department is the design and fabrication of custom roll bars / cages, custom headers and exhaust systems as well as custom intercoolers and induction plumbing.

V-FLOW AIR INDUCTION

Engineered utilizing state of the art CAD CAM 3D modeling, CNC machining, computer controlled Superflow air flow testing, rotational molding, injection molding and countless man hours. The V-Flow air intake systems from EVOMS represent the apex of air induction technologies. We manufacture our proprietary air induction systems for most high performance vehicles.

EVOMS SIGNATURE PRODUCTS

Choose from personalized steering wheels, floor mats, shift knobs, aluminum pedals and much more to customize your vehicle. We also offer custom interior personalization with suede and alcantara.

PERFORMANCE FOCUSED

At EVOMS we use only the best performance brands. From ELF synthetic engine oil and Motul brake fluids to high performance transmission oil and high octane race fuel.

COOL CARBON - BRAKE PADS

Evolution MotorSports recommends Cool Carbon™ Performance brake pads for Porsche and BMW. Extensive coverage is available for current Porsche models including GT2 and GT3 and back to early 911 Turbo applications.

Cool Carbon™ Performance pads exhibit a high coefficient of friction and are extremely fade resistant, yet they do not need to be warm to be effective. They are low dust, virtually noise free and offer infinite control for pedal modulation and braking force.

EVOMS Essentials!

PILOTI DRIVING SHOES

Piloti is Italian for "racing drivers". No truer expression could be found for Piloti shoes. Kevin Beard, founder of Piloti Shoes, wanted to get back to the cars and racing he loved. In 1999, he left his director's post at K-Swiss to pursue something he always wanted to do: Create a line of authentic driving shoes that would not only be innovative in how they perform in fierce racing conditions, but also stylish and comfortable enough for the street. Ask us to try a pair on.

SWAG

Check out our seasonal and event themed SWAG! Shirts, hats, key chains stickers, coffee cups, and on and on. There is something for everyone, and every vehicle!

ELECTRIC SUNGLASSES

A mad scientist named Jim Jannard began questioning the limits of industry standards. "No one believed my ideas," said Jim. "No one would listen." In 1975, he went into business for himself. Jim started Oakley with \$300 and the simple idea of making products that work better.

RACE FUEL HIGH OCTANE ENERGY

This is boost. This is high revs. This is energy in a can! RACE FUEL is NOT for vehicle consumption. This is for the human guts for race day.. or yard work day... or watching LeMans on the 100" plasma. Available exclusively at Evolution MotorSports and EVOMS Premier Partners!
