

## DMC "Sturm": Carbon Fiber Styling for the Porsche Panamera

**Dusseldorf**, Evolution MotorSports German Partner, DMC just announced another part of its official Carbon Fiber Styling Kit for the Porsche Panamera. The aerodynamic components included in the set stay loyal to the designer's "Simple yet Dynamic" vision:

The components are manufactured from 100% pure carbon fiber and improves the Stuttgart Stallion's appearance significantly: The front lip spoiler not only reduces the lift on the front axle, but also adds an aggressive look to the Panamera's appearance. The side grilles showcase the DMC's exceptionally high skills of manufacturing carbon fiber which not only fit perfect, but add a nice accent to the side body. The rear diffuser also supports the driving stability by improving the air-flow and the looks make the Panamera stand out in the crowd.

**Package Price:** Front Diffuser, Side Vents & Rear Diffusor \$6495

- These components are available as a complete package or sold separately
- Direct Replacement for OEM parts
- Simple installation - No Modifications.
- Available in High Gloss UV protected clear coated (as Pictured)
- Also Available in a Flat Matte Carbon Finish

## About DMC

DMC Tuning designs and manufactures the highest quality carbon fiber components for an exclusive line of high performance automobiles. Their designs refine the OEM style while enhancing the aerodynamic flow and capturing the uniqueness of each individual vehicle.

DMC's German founders have a remarkable passion for luxury cars and their distinctive design features. The enhancements they create embody an appreciation towards automobile tradition, craftsmanship and precision technology. It is these values that defined the name "Made in Germany" all over the world as a sign of products of the highest quality.

DMC design techniques are cutting edge and incorporate unparalleled manufacturing standards. Using remarkably intelligent engineering combined with the finest materials and manufacturing practices shows DMC's leading quality and passion to produce the best.

***"Carbon fiber components that stand out with their dynamic design  
yet keep the original values"***
